

RRPL HOUSING GROUP

Internal Office Management Software

Software Requirement Specification (Phase 1)

1. Project Vision

The RRPL Housing Group Internal Office Management Software will provide a single platform for managing customer enquiries, property inventory, employee activities, follow-ups, and bookings. The goal is to replace Excel sheets and manual tracking with a secure, easy-to-use web application for office staff.

2. Business Objectives

- Centralize all customer and property information.
- Track every enquiry from first contact to booking.
- Monitor employee productivity and pending tasks.
- Display live availability of flats, plots, shops and offices.
- Improve communication between management and sales staff.

3. User Roles

Administrator

Complete control over employees, inventory, leads, bookings and reports.

Sales Executive

Manage assigned leads, update follow-ups, schedule meetings and maintain customer remarks.

Manager

Monitor team performance, review reports and reassign leads when required.

4. Core Modules

Dashboard – Daily business overview.

Lead Management – Customer enquiry tracking.

Property Management – Flats, plots, shops and office inventory.

Employee Management – Team records and performance.

Follow-up Module – Call logs, meetings and reminders.

Booking Module – Booking records and payment status.

Reports – Daily, weekly and monthly summaries.

5. Dashboard Features

Dashboard should display:

- Total Leads
- New Leads Today
- Pending Follow-ups
- Today's Site Visits
- Available Properties
- Booked Properties
- Employee Activity Summary

6. Lead Workflow

New Enquiry → Lead Created → Assigned to Executive → Follow-up → Site Visit → Negotiation → Booking / Lost Lead

7. Property Inventory

Maintain complete details including Property ID, Project Name, Unit Number, Floor, Area, Price, Status, Customer (if reserved), and Remarks.

Status: Available, Hold, Reserved, Sold.

8. Reports & Benefits

Generate employee performance reports, lead conversion reports, inventory status reports and booking summaries.

Expected Benefits:

- Faster customer response
- Better team coordination
- Accurate inventory records
- Reduced manual work
- Better decision making

9. Recommended Technology

Frontend: React + Tailwind CSS

Backend: Node.js + Express.js

Database: MySQL

Authentication: JWT

Deployment: Office Server or Cloud VPS

10. Development Roadmap

Phase 1: Login, Dashboard, Leads, Inventory.

Phase 2: Employees, Follow-ups, Reports.

Phase 3: Notifications, Backup, Export, Future Integrations.

Prepared For: RRPL Housing Group

Document Purpose: Internal Software Planning & Development Blueprint
